The current 234-clip test set cannot resolve a +1 point effect
(how large would the test set have to be?)
current test set
234 clips
n=1320
n=2491
n=4829
McNemar chi2 (log scale)
number of test clips
discordant fraction 5%
discordant fraction 10%
discordant fraction 20%
significance threshold (chi2 = 3.84)
