Unsupervised label audit of a public crowdsourced dataset
1. Ingestion
1,368 WAV files
53 species, 12.68 h
manifest
2. Chunking
5.0 s non-overlapping
48 kHz + 16 kHz
9,289 chunks
3. Audit
BirdNET-Analyzer V2.4
3 s sliding windows
max-pool -> S
4. Cleaning
frozen thresholds
empty / intruder / amb.
keep concordant
5. Train + Eval
MFCC 39 -> LSTM
Model A vs Model C
Macro-F1
No human labelling and no waveform enhancement: the audio is never modified, only the training labels are filtered.
